ABOUT ME

I love creating memorable experiences with others. I'm accustomed to working in deadline-driven environments, with multiple long-term game projects under my belt as well as 2 game jam games. I have experience making many genres: 2D, 3D, mobile, multiplayer and serious games, as well as managing a dev team. I can effectively communicate with every department involved. I have a strong grasp of top-down design, object-oriented programming and game design principles.

SKILLS

EDUCATION

Bachelor's in Games and Entertainment Technology Nord University

August 2021 to June 2024 (3-year course)

- **Student:** Had courses on C#, game design, systems, audio, 3D modelling, publishing and professionalism.
- **Team lead:** I coordinated a team of 6 people to pitch and develop a game in my first semester.
- **3 full game projects so far:** Each semester I worked with a new team pitching and creating a unique game.

WORK EXPERIENCE

Social Workshop Host Excited Centre of Excellent IT Education

October 2022 to present Levanger, Norway

Hosted workshops to playtest students' games and teach many areas such as Unity familiarity, C# fluency, effective UI design, game design and graphic design.
